Portek – 1-Page B2B Account Plan

Account Overview

Account Name: Portek International Pte Ltd

Industry: Maritime | Port Operations | Port Equipment Engineering | Port IT & Automation

HQ: Singapore

Parent: Mitsui & Co. (Japan)

Account Tier: Strategic / Global Enterprise

Relationship Status & Key Interaction

- **Named Contact Met: David Lim – Head of IT (Group)**
- **Meeting Insight (Critical):**
  - David highlighted a **major legacy-system challenge**: Portek lacks a **unified, real-time view of shipment data across ports**.
  - Data related to **vessels, shipments, berths, yard activity, equipment status, and terminal operations** is spread across **disparate systems** by location.
  - Each port operates semi-independently with local tools, resulting in **fragmented visibility at HQ**.
  - Visibility gaps drive **manual reconciliation, delayed decision-making, reactive operations**, and limited cross-port optimization.

Business & Operational Context

Portek is a **port operator and engineering-led solutions provider**, managing

and modernizing medium-sized container and multipurpose terminals across multiple geographies. The company uniquely combines **port operations, heavy equipment engineering, and proprietary IT systems**, often deploying refurbished assets and customized local solutions to rapidly upgrade terminals.

Operating Reality:

- Multiple terminals across regions with **varying levels of IT maturity**
- High asset intensity (cranes, yards, berths, handling equipment)
- Strong focus on **throughput, uptime, cost efficiency, and time-to-market**
- Operations in emerging markets where reliability and resilience matter more than greenfield IT

- ---

Geographic Footprint (Where Portek Operates)

- **Singapore** – Headquarters & central decision-making hub
- **Indonesia** – Large operational and terminal base
- **Africa** – Gabon, Algeria (container & multipurpose terminals)
- **Europe** – Malta, Latvia
- **Vietnam** – Terminal operations and engineering projects

This footprint creates high complexity in **cross-port visibility, reporting consistency, and centralized governance**.

How Portek Earns Revenue (Business Model)

Portek operates a **diversified revenue model**:

1. **Port & Terminal Operations**
    - Operating and managing container and multipurpose terminals
    - Revenue from handling charges, concessions, and throughput-based

fees

1. **Port Equipment Engineering**
    - Crane refurbishment, modernization, relocation, and lifecycle extension
    - Maintenance contracts, emergency repair, and technical consultancy
1. **Equipment Sales & Leasing**
    - Sale and lease of refurbished port equipment
    - Parts distribution and asset-lifecycle services
1. **Port IT & Automation Solutions**
    - Terminal management systems, vessel traffic systems, automation, and simulation
    - Custom IT solutions bundled into turnkey port transformation projects

---

Problem Statement (Expanded)

Core Issue: Legacy, siloed systems prevent Portek from having a **single source of truth across terminals and regions**.

Observed Gaps:

- No consolidated dashboard for **vessel arrivals, berth status, shipment progress, yard inventory, and equipment availability**
- Inconsistent data models and KPIs across ports
- Limited real-time and historical analytics at HQ level
- Heavy reliance on emails, spreadsheets, and manual reporting
- Poor ability to compare performance across terminals

Business Impact:

- Slower operational and commercial decisions
- Suboptimal asset utilization and higher downtime risk
- Inability to scale best practices across ports
- Limited predictive capability (everything is reactive)

Strategic Opportunities (AI & Data-Led)

High-Value Opportunity Themes:

1. **Unified Port Data & Visibility Platform**
   - Integrate data from TOS, vessel systems, yard systems, and engineering systems
   - Single dashboard view for HQ and regional leaders
1. **AI-Driven Operational Intelligence**
   - Vessel ETA and berth congestion prediction
   - Yard, crane, and equipment utilization analytics
   - Shipment dwell-time and delay prediction
1. **Cross-Port Benchmarking & Optimization**
   - Compare productivity, turnaround times, and bottlenecks across ports
   - Identify best-performing terminals and replicate practices
1. **Future Extensions**
   - Predictive maintenance for cranes and heavy equipment
   - Digital twins of terminals
   - Energy optimization and sustainability / ESG reporting

2.

Executive & Strategy Stakeholders

- **CEO:** Seishi Matsumoto / Yasutaka Suzuki *(varies by entity and filing)*
- **CFO / CAO:** Toshiki Ota
- **Chief Strategy Officer:** Kok Leong Liew
- **Head of IT:** David Lim
- **Engineering Heads:** Tet Htut, Rahuvaran Rawindaran
- **Business Development:** Akihiro Kasahara

These leaders influence **technology modernization, capital allocation, and**

transformation priorities.

Target Buyers & Influencers

- **Primary Buyer:** Head of IT (David Lim)
- **Strong Influencers:** Operations, Engineering, Strategy
- **Economic Buyer:** Executive Management / Group Strategy (with Mitsui oversight)

Value Proposition (For Portek)

"A unified, AI-powered operational intelligence layer that gives Portek a **real-time, cross-port view of vessels, shipments, and assets**, enabling faster decisions, higher throughput, and scalable best practices — without replacing existing core systems."

Engagement Strategy & Next Steps

Phase 1 – Discovery & Validation

- Deep-dive with IT + Operations on systems, data sources, and workflows
- Identify 1–2 pilot terminals

Phase 2 – Pilot

- Unified vessel & shipment visibility dashboard
- Success metrics: decision latency, reporting effort, dwell time

Phase 3 – Scale

- Roll-out across regions
- Introduce predictive and optimization use cases

Latest Updates / Signals

- Continued focus on **port modernization, IT, and automation** as part of turnkey offerings
- Ongoing emphasis on **security and compliance** (e.g., ISO-aligned IT practices)
- No recent public acquisitions; strategy remains **operational excellence and scalable transformation**

Why Portek is a Strategic Fit

✅ Global, multi-terminal footprint

✅ Confirmed legacy-data pain from Head of IT

✅ Engineering-driven culture aligned to asset intelligence

✅ Preference for incremental modernization over rip-and-replace

✅ High ROI from visibility and AI before full automation

Account Objective: Establish our company as Portek's **long-term strategic AI & data partner**, starting with unified shipment and vessel visibility and expanding into predictive, optimized port operations.
